

Dictionary of Environmental and Climate Change Law, 2013, 293 pages, Nicholas A. Robinson, Wang, Xi (Law professor), Lin Harmon, Sarah Wegmueller, 0857935771, 9780857935779, Edward Elgar Publishing Limited, 2013

This state-of-the-art Dictionary defines terms employed in international agreements, national legislation and scholarly legal studies related to comparative and international environmental law and the emerging law of climate change. In acknowledgement of China's growing role in this arena, each term also includes its pinyin translation in order to facilitate access to the Mandarin variants. The international community is developing increasingly complex environmental provisions and participating in a number of international treaties and agreements related to environmental law and regulation. The complicated and highly specific nature of environmental law has led to the development of localized terminology that is not easily understood outside its country of origin. Jointly prepared by scholars in China and the US, the Dictionary provides a linguistic bridge between English and Chinese speakers as well as an essential reference for those interpreting and applying international environmental law, multilateral environmental agreements, and domestic laws that implement these treaties. Students, scholars and practitioners in the area of environmental law will find this groundbreaking Dictionary an invaluable addition to their libraries.
